

2003-2010

2003 – Survey on Borewell Incidents-Fire Officer Mr Chandrakumar, Dhindukal who involved in rescue operation at papampatti Borewell Incident

2003-Based on the input from Fire Officer our team visited Dhevarajan family (Victim of Borewell Trap) and collected data about rescue operation and the actual effort carried out for rescue operation

2003-Initiated research to develop a device to rescue children from borewells- visited ONGC to know the temperature and humidity present in the deep wells and the other gaseous substrates in deep wells

2003 -Based on the data collected and the findings from the survey, we have developed a device to rescue infants from borewells and it is tested with prototype models and the deep well sensors developed to assist the rescue team and the paramedical team.

2004-After various tests and demonstrations the device is launched officially on 04.08.2004

Launch of device is widely published in news papers and media

03.10.2010 -Demonstration to the Fire and Rescue Service Department district heads at TNFRS Head Quarters Egmore Chennai in the presence of Mr Natarajan I.P.S Director TNFRS

03.10.2010-Question and answer session after demonstration and cleared all the doubts about deepwell operations by K P Sridhar

02.08.2010 Magazine clipping about the device developed by us after involving in a incident
